PROFESSIONAL SUMMARY

Senior Linux & Infrastructure Engineer with 9+ years of experience administering and supporting enterprise infrastructure across on-premises data centers, VMware virtualization, AWS cloud, and hybrid environments. Strong expertise in Linux administration, infrastructure automation, cloud operations, production support, system hardening, patch management, monitoring, and troubleshooting. Hands-on experience with RHEL, OEL, Ubuntu, CentOS, Debian, VMware ESXi, Docker, AWS, Ansible, Terraform, Jenkins, Git, Bash/Shell scripting, Prometheus, Grafana, Nagios, Nginx, Apache, HAProxy, Bind9 DNS, SSL/TLS, LVM, RAID, firewalls, and backup/recovery technologies. AWS Certified Solutions Architect – Associate with practical experience across EC2, VPC, IAM, S3, EBS, RDS, Route 53, Auto Scaling, Load Balancers, and CloudWatch. Experienced in Infrastructure as Code using Terraform, configuration management and automation using Ansible, CI/CD using Jenkins and Git, containerized application delivery using Docker, and enterprise monitoring using Prometheus, Grafana, Nagios, and CloudWatch. Strong background in Linux patching, OS upgrades, vulnerability remediation, security hardening, performance tuning, incident management, root cause analysis, SSL/TLS certificate lifecycle management, and L3 production support.

CERTIFICATION & TRAINING

AWS Certified Solutions Architect – Associate -AWS -08/2026-08/2029

- Credential ID 68b389e45e41415097728caa6528d992

Linux training-Intellipaat-12/2024

- Credential ID 31679-912747-159648

Devops Training-Intellipaat-10/2023

- Credential ID 31679-4756421-159648

AWARDS

Certificate of Appreciation for extraordinary innovation and commitment
Issued by Managing Director SIRMA
04/05/2022

Employee of the month
Issued by Infogain india pvt ltd
14/11/2025

PROFESSIONAL EXPERIENCE

Infogain India Pvt. Ltd.

Senior consultant Tech & support

09/2025 – 08/2026 | Bengaluru, India

- Administered enterprise Ubuntu Linux servers across **Dev, QA, CI, Preview, Test, and Production** environments, ensuring system availability, performance, and operational stability.
- Managed AWS infrastructure across **EC2, VPC, IAM, S3, RDS, Route 53, Auto Scaling, and CloudWatch**, covering provisioning, monitoring, security, backup, troubleshooting, and performance optimization.
- Performed Linux **OS installation, patching, upgrades, vulnerability remediation, and security hardening** while maintaining service availability.
- Automated Linux server provisioning, configuration, and recurring operational tasks using **Ansible playbooks, Ansible roles, and Bash/Shell scripting**.
- Administered and troubleshoot **Apache, Nginx, HAProxy, and Bind9 DNS**, including configuration and performance tuning.
- Managed the complete **SSL/TLS certificate lifecycle**, including PEM/PFX certificate deployment, configuration, renewal, and troubleshooting.
- Performed Linux performance optimization involving **kernel parameters, CPU, memory, swap, filesystem, and disk resources**.
- Provided **L3 production support**, handling incidents, troubleshooting, problem resolution, root cause analysis, and technical documentation.
- Supported enterprise infrastructure security, availability, monitoring, and operational improvement activities.

E-Solutions IT Services Pvt. Ltd

Senior Linux Administrator (Client - Infogain India pvt ltd)

03/2025 – 09/2025 | Bangalore, India

- Administered data-center hosted **virtual Linux servers and AWS EC2 instances**, maintaining availability, performance, and operational stability.
- Managed enterprise Linux **patching, OS upgrades, security hardening, vulnerability remediation, and compliance activities**.
- Administered AWS **EC2, VPC, IAM, EBS, S3, Route 53, and CloudWatch** for infrastructure provisioning, monitoring, backup, and troubleshooting.
- Automated deployment and configuration of **Node Exporter, Apache, Nginx, HAProxy, and monitoring agents** using automation tools.
- Performed **LVM and filesystem administration**, including volume creation, filesystem management, storage expansion, and recovery.
- Managed **DNS services, SSL/TLS certificates**, and security tools including **DUO and Nessus**.
- Supported production workloads through **incident troubleshooting, problem management, and root cause analysis**.

Sirma Business consulting India Pvt ltd

Principal Infrastructure Engineer

10/2022 – 08/2024 | Bangalore, India

- Led administration and optimization of **on-premises, AWS, and hybrid infrastructure**, focusing on scalability, availability, security, and performance.
- Designed and managed AWS infrastructure using **EC2, VPC, IAM, S3, RDS, Route 53, Auto Scaling, CloudWatch, and Load Balancers**.
- Administered Linux infrastructure across **Development, Test, and Production** environments, including provisioning, patching, upgrades, configuration, and performance tuning.
- Managed **VMware ESXi virtualization** and **Docker container platforms**, including provisioning, configuration, troubleshooting, and lifecycle management.
- Implemented **Infrastructure as Code using Terraform** to provision and manage AWS resources through scalable and repeatable deployments.
- Developed and maintained **CI/CD pipelines using Jenkins and Git**, integrating Ansible for infrastructure and application deployment automation.
- Developed **Ansible automation** for configuration management, provisioning, deployment, and recurring infrastructure operations.
- Implemented centralized **monitoring, logging, and alerting using Prometheus, Grafana, Nagios, and AWS CloudWatch**.

CORE COMPETENCIES & SKILLS

- **Linux & Systems Administration::** RHEL, OEL, CentOS, Ubuntu, Debian, Linux Server Administration, OS Installation & Configuration, Patching & Upgrades, Vulnerability Remediation, System Hardening, Performance Tuning, User & Access Management
- **Cloud & Infrastructure::** AWS, EC2, VPC, IAM, S3, EBS, RDS, Route 53, Auto Scaling, CloudWatch, Load Balancers, Hybrid Infrastructure, Infrastructure Provisioning, Cloud Operations
- **Infrastructure Automation & IaC::** Ansible, Ansible Playbooks & Roles, Terraform, Shell Scripting, Configuration Management, Server Provisioning, Deployment Automation, Infrastructure as Code
- **DevOps & CI/CD::** Jenkins, Git, GitHub, GitLab, CI/CD Pipelines, Docker, Docker Images, Docker Hub, Automated Deployments
- **Virtualization::** VMware ESXi, VirtualBox, Hyper-V, VM's Administration, Provisioning, Configuration & Troubleshooting
- **Web, Application & Load Balancing::** Apache, Nginx, HAProxy, Web/Application Server Administration, Load Balancing, Configuration & Troubleshooting
- **Monitoring, Logging & Alerting::** Prometheus, Grafana, Nagios, AWS CloudWatch, Node Exporter, Infrastructure Monitoring, Alerting,
- **Networking & Infrastructure Services::** DNS, Bind9, DHCP, VPN, SSH, SFTP, FTP, Samba, NFS, IP Configuration, Network Troubleshooting
- **Security & Certificate Management::** SSL/TLS, OpenSSL, PEM/PFX Certificates, SELinux, FirewallD, iptables, UFW, DUO, Nessus, Security Hardening
- **Backup/Recovery Solutions & utilities::** LVM, RAID, Filesystem Administration, Veeam Backup & Replication, Rsync, MongoDump, ExpDP, MySQLDump
- **Patch & Lifecycle Management::** ManageEngine Endpoint Central, Ubuntu Landscape, YUM, APT, Linux Patching, OS Upgrades, Vulnerability Remediation, Server Lifecycle Management
- **Production Operations::** L3 Production Support, Incident Management, Problem Management, Root Cause Analysis (RCA), Performance Optimization, Technical Documentation
- **ITSM & Collaboration Tools::** Jira, Redmine, Bugzilla, GitHub, GitLab

EDUCATION

Bachelor of Technology (B.Tech), Asansol engineering college
West Bengal
07/2015 | Asansol, India

- Built and maintained **Docker images and containerized application environments**, integrating Docker with CI/CD workflows.
- Administered enterprise application and database platforms including **Oracle, MongoDB, WebLogic, and WildFly**.
- Implemented Linux infrastructure security, patch management, backup, troubleshooting, and operational best practices across hybrid environments.

Senior Linux System Administrator

08/2021 – 10/2022 | Bangalore, India

- Designed, implemented, and administered **high-availability Linux infrastructure** across enterprise environments.
- Automated server provisioning, system builds, deployments, and recurring operational activities using **Jenkins CI/CD, Bash/Shell scripting, and automation tools**.
- Administered enterprise web, application, and database services with focus on availability, performance, and incident resolution.
- Implemented Linux security hardening and access controls using **iptables, Fail2Ban, and SELinux**.
- Supported **AWS cloud workloads and VMware virtualization environments**, including provisioning, configuration, monitoring, and troubleshooting.
- Performed Linux patch management, system optimization, troubleshooting, and production support.

Linux System Administrator

12/2020 – 08/2021 | Bangalore, India

- Installed, configured, and administered **RHEL, Ubuntu, CentOS, and Debian** Linux servers in enterprise environments.
- Managed **LVM, RAID, filesystems, storage, backup, and disaster recovery** operations.
- Monitored system availability, capacity, and performance using **Nagios**, investigating and resolving infrastructure issues.
- Implemented Linux security hardening, firewall configuration, patching, and access controls.
- Supported **Linux OS upgrades, migrations, and lifecycle management** across large-scale server environments.
- Performed Linux troubleshooting, system administration, user management, networking, and production support activities.

Junior Linux System Administrator

05/2020 – 12/2020 | Bangalore, India

- Assisted with **Linux installation, configuration, user management, networking, and system monitoring**.
- Provided L1 technical support and troubleshooting for Linux systems and associated services.
- Performed routine system administration, system health checks, and operational activities.
- Maintained technical documentation and incident records.

M/S ARTCON

IT Service Engineer

01/2017 – 11/2018 | Mumbai, India

- Diagnosed and resolved hardware, software, and **Windows/Linux operating system** issues.
- Managed **LAN connectivity, router configuration, system installations, and network troubleshooting**.
- Provided remote and on-site technical support and incident resolution.
- Maintained incident records and technical troubleshooting documentation.

MECON LIMITED

Engineer (Trainee)

01/2016 – 01/2017 | Ranchi, India

- Troubleshoot hardware, software, and Windows/Linux operating system issues.
- Configured **LAN connectivity, routers, IP settings, and system installations**.
- Provided remote and on-site technical support to end users.
- Maintained incident and resolution documentation.

DECLARATION

I hereby declare that all the information mentioned above is true and correct on the base of my knowledge.
